KORG SQ10 SYNCHRONIZER / EXTENSION

All 'FROM SQ10' and 'TO SQ10' jacks should be connected to their appropriate connectors on the KORG SQ-10.

From KORG SQ-10 TRIG OUT

Other KORG SQ-10 connectors

Sync-24 Outputs

The Sync-24 Thru outputs are useful to connect other Sync-24 devices in chain. It is the same signal that is connected to the Sync-24 inputs. However, the outputs are amplified for better signal quality. The 5-pin DIN connectors and the 3.5 mm jacks can be used simultaneously.

Sync-24 Inputs

The SQ10 EXT can be driven via a 5-pin DIN Sync-24 connector or by two 3.5 mm jacks. If the 3.5 mm jacks are used input from the 5-pin DIN connector is ignored.
